

# 4MAG Nitrous

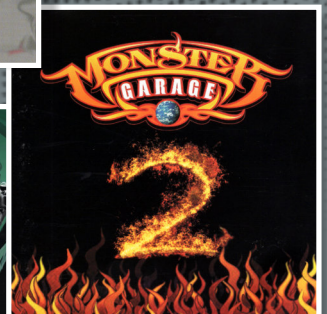

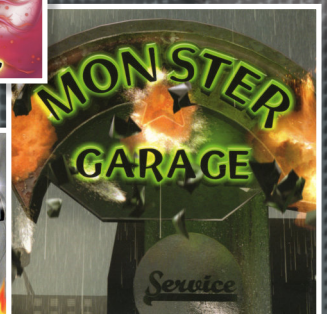

So we're driving down the road of heavy music, and on the left side we have Metal, and on the right side we see scrolling mountains of Hard Rock. But where is the middel ground? That spot between hard rock and heavy metal? Oh... it's the road.

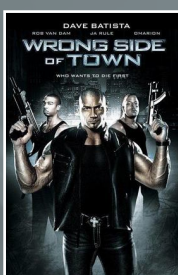

4MAG NITROUS is the vehicle that takes you down that highway in the valley between rock and metal. And it ain't no rented Kia. It's a powerful American muscle car, with a gridlocked precision that indicates a hint of solid German engineering was applied for maximum stamina and torque.

Hit the gas pedal and feel how the music grinds like metal but stays solid like a rock under your tires. Kick the seat back a little and enjoy the singer's words as he yells and growls at you from the back seat. Ignore that school zone and keep going! You'll be alright. The cops are only chasing you because they want an excuse to drive this fast, down this road, as well.
